**Title:** Platform governance and social justice: governing hate speech on social media by Otero, Paloma Viejo

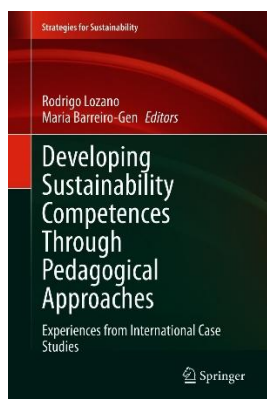

India Emerald Publishing 2025

**Acc. No.** 009513

**Call No.** 320.954 OTE

**Summary:** Platform Governance and Social Justice outlines principles and mechanisms social media platforms have adopted to govern hate speech, exploring how a social justice approach to hate speech regulation would effectively reduce the circulation of harmful content targeting historically oppressed groups. Identifying four traditional approaches that have underpinned hate speech regulation in the contemporary digital landscape, Otero proposes a fifth approach called the Social Justice Approach (SJA), an original contribution to the field of research.

New York Routledge 1983

**Acc. No.** 009522

**Call No.** 330 GRA

**Summary:** Originally published in 1983, the real nature of the relationship between economics and alcohol is explored in detail for the first time in this book. It argues for increased participation by economists in the processes of social policy decision-making and considers the key issues of cost-benefit analyses, control policies, taxation and programme efficiency. No easy solutions are provided, but a host of unjustified assumptions about this subject are clarified. This book paved the way for substantial future collaboration between economists and those involved in alcohol studies.

**Summary:** This book identifies and analyses the Eco-Weird as an interdisciplinary theoretical tool for engaging in fictional, philosophical, filmic, and ludic texts. It is the first volume to engage in the study of the Eco-Weird, which is a developing field at the intersection of environmental thought and Weird fiction, broadly construed to include literature, games, films, art, and television shows. The Eco-Weird has intersections with other literary and scholarly fields, including horror studies, game studies, phenomenology, literary criticism, and eco-criticism, but provides a unique set of tools to engage both its texts and the ongoing environmental crises of climate change, environmental justice, pollution, and more.

**Summary:** Artificial Intelligence (AI) is everywhere, yet it causes damage to society in ways that can't be fixed. Instead of helping to address our current crises, AI causes divisions that limit people's life chances, and even suggests fascistic solutions to social problems. This book provides an analysis of AI's deep learning technology and its political effects and traces the ways that it resonates with contemporary political and social currents, from global austerity to the rise of the far right. This unique book will be of interest to all who wish to challenge the social logic of AI by reasserting the importance of the common good.

**Summary:** This Element is about agent-based macroeconomics in general, and in particular about a family of evolutionary, agent-based models (ABMs), which are called 'Schumpeter meeting Keynes' (or K+S). The K+S models knit together 'Schumpeterian' endogenous processes of innovation with 'Keynesian' mechanisms of demand generation. After the K+S model is empirically validated, the impacts of different combinations of innovation, industrial, fiscal, and monetary policies for different labour-market regimes and inequality scenarios are assessed.

**Summary:** Neoclassical economics is heavily based on a formalistic method, primarily centred on mathematical deduction. Consequently, mainstream economists became overfocused on describing the states of an economy rather than understanding the processes driving these states. However, many phenomena arise from the intricate interactions among diverse elements, eluding explanation solely through micro-level rules. Such systems, characterised by emergent properties arising from interactions, are defined as complex.
