NEW ARRIVAL OF PRINT BOOKS

MAY 2026

Sr. No. 01

Title: Transforming the pharmaceutical supply chain By Rees, Hedley

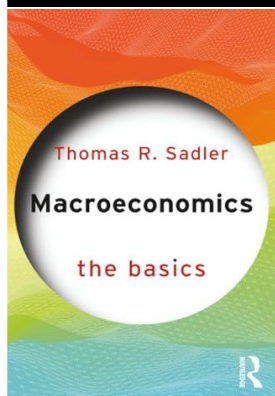

New Jersey Wiley 2025

Acc. No. 011124

Call No. 658.78 REE

Summary: In Transforming the Pharmaceutical Supply Chain, veteran biotech supply chain strategist, Hedley Rees, delivers a reasoned and systematic solution to the most widespread and relevant challenges in the pharmaceutical supply chain. The book explains the deeply rooted issues within pharma supply chains and the modus operandi of the industry while also discussing effective solutions to the underlying causes that led to widespread system breakdown.

Sr. No. 02

Title: Macroeconomics: the basics by Sadler, Thomas R

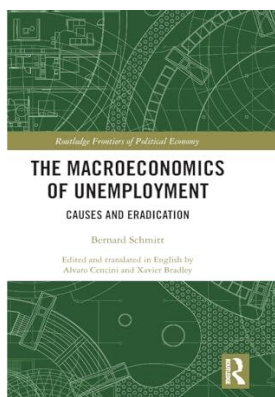

New York Routledge 2026

Acc. No. 011125

Call No. 338.5 SAD

Summary: The book covers the most important areas in macroeconomics, including national income, unemployment and inflation, economic growth, savings, investment, the financial system, money and banking, money and inflation, aggregate expenditures, aggregate demand and supply, fiscal policy, monetary policy, international trade, and international finance. Macroeconomics: The Basics provides a concise, accessible treatment of the subject, using an economics framework to analyze the theories, policies, and applications of the field.

Sr. No. 03

Title: Macroeconomics of unemployment causes and eradication by Schmitt, Bernard

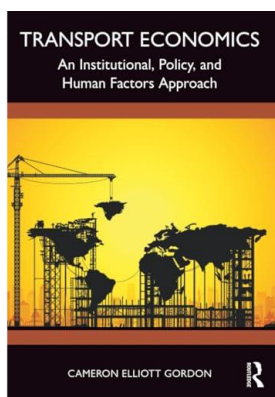

Routledge New York 2026

Acc. No. 011126

Call No. 331.137 SCH

Summary: This book explores unemployment from a monetary macroeconomics perspective, identifying the pathology at the origin of unemployment and the principles of reform that will enable a passage from capitalism to post-capitalism. Bernard Schmitt explores the problem of involuntary unemployment by developing his quantum monetary macroeconomic analysis, demonstrating that the presence of fixed capital increases both physical productivity and the production of economic value.

Sr. No. 04

Title: Transport economics: an institutional, policy, and human factors approach by Gordon, Cameron Elliott

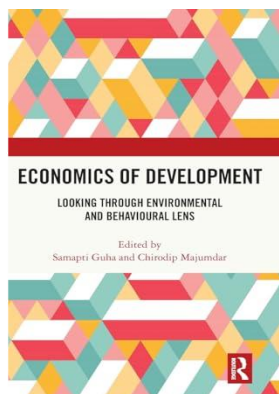

Routledge New York 2026

Acc. No. 011127

Call No. 330 GOR

Summary: This book takes an interdisciplinary, institutional, and historically informed approach to the economics of transport, providing a more nuanced and complete understanding of human transport choices, individually and collectively, and the related choice of location, including the formation of cities. The book examines the implications of the unique particularities of human beings, including the quirks of their psychologies and physical bodies, for transport planning, development, and implementation. A focus is kept on the “real world” policy complications that arise so frequently in the transport arena.

Title: Economics of the energy crisis: environment, policy and security in the Indian subcontinent by Bhukta, Anindya

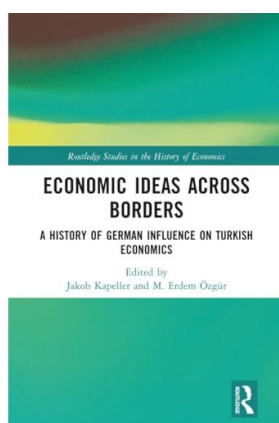

Abingdon Routledge 2026

Acc. No. 011129

Call No. 333.79 BHU

Summary: The global energy crisis is a two-dimensional phenomenon: on the one hand, the gap between a continuously depleting supply capacity of fossil fuel and rapidly increasing demand for energy is fast widening, and, on the other, the burning of fossil fuels intensifies the problem of global warming day by day. The book examines the root cause of the problem: the supply-demand imbalance of energy. Alongside this, market imperfections in energy pricing are also discussed. The second section of the volume explores the environmental and political dimensions, examining policies in the region designed to provide a sustainable environment.

Sr. No. 08

Title: Real world economics: methodological, theoretical and critical issues by Beker, Victor A

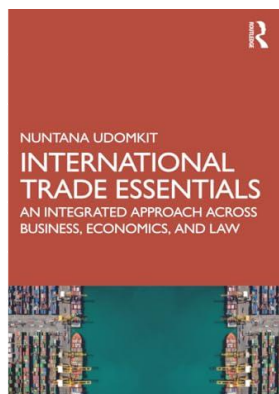

Abingdon Routledge 2026

Acc. No. 011131

Call No. 330.1 BEK

Summary: This book is that economics is an applied science: a tool to understand the real-world economy and a guide for economic policy. In contrast to the unrealistic and artificial models of neoclassical economics, the book argues that the point of departure for economic theory should be the real world with realistic assumptions being made. This book is essential reading for anyone seeking a deeper understanding of the economy, including readers from economics and across the social sciences. In this respect, it also includes some reflections on the failure of Third Way ideas to deliver on their promises.

Title: *Clashing vulnerabilities, disability and conflict* by Kuclick, Don

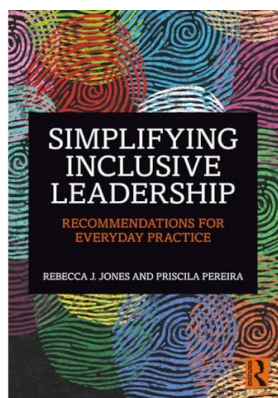

Routledge Abingdon 2026

Acc. No. 011161

Call No. 362.408 KUL

Summary: This book is about how we might think about vulnerability—what it is and how it operates—by looking at cases where different kinds of vulnerabilities clash. This book disassembles that label by highlighting how vulnerabilities involving people with disabilities emerge and how they often conflict with other vulnerabilities: the vulnerabilities of disabled students vs. the vulnerabilities of under-educated and harassed teachers. Clashes like these illustrate the role that conflict plays in defining “vulnerability” and they lead us to think about how we might try to adjudicate between different claims of what can count as a vulnerability.

Summary: This book exposes how illicit finance hides in plain sight within legitimate global trade. Drawing on real-world cases, empirical interviews, and policy analysis, the book reveals how Trade-Based Money Laundering (TBML) exploits regulatory gaps, dynamic supply chains, and the ambiguities of modern commerce. The book offers a critical recommendation for moving from the mirage of oversight to effective disruption.

Title: Statistics as principled argument by Abelson, Robert P

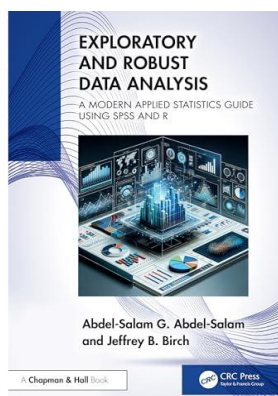

New York Routledge 2026

Acc. No. 011170

Call No. 001.422 ABE

Summary: In Statistics as Principled Argument, first published in 1995, Robert P. Abelson exposes the often-overlooked problems in quantitative data interpretation, and the challenge of presenting the data in terms of a coherent narrative about one's research. This book offers a new introduction which views Abelson's work through a contemporary lens, highlighting how his teachings remain vitally relevant today. The ideas throughout the book revolve around elementary probability theory, t-tests, and simple issues of research design. Many examples are included to explain the connection of statistics to substantive claims about real phenomena.

Title: Exploratory and robust data analysis: a modern applied statistics guide with SPSS and R by Abdel-Salam, Abdel-Salam G

Boca Raton CRC Press 2026

Acc. No. 011171

Call No. 519.535 ABD

Summary: Exploratory and Robust Data Analysis: A Modern Applied Statistics Guide Using SPSS and R is an essential resource for students, researchers, and professionals seeking a comprehensive yet practical approach to modern statistical analysis. This book bridges traditional statistical methods with contemporary techniques, emphasizing exploratory and robust data analysis while integrating powerful computational tools such as R and SPSS. This book fosters an analytical mindset that encourages critical thinking and data-driven decision-making by combining classical statistical procedures with modern computational methods.

Title: Visualization for social data science by Beecham, Roger

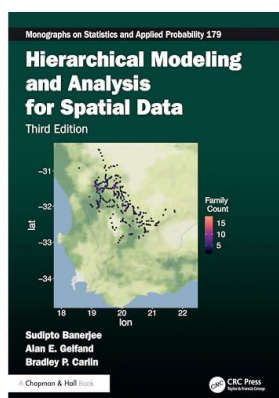

Boca Raton CRC Press 2026

Acc. No. 011172

Call No. 001.4226 BEE

Summary: Visualization for Social Data Science provides end-to-end skills in visual data analysis. The book demonstrates how data graphics and modern statistics can be used in tandem to process, explore, model and communicate data-driven social science. It is packed with detailed data analysis examples, pushing you to do visual data analysis. This book shows how models can be integrated with graphics to emphasise important structure and de-emphasise spurious structure and the role of data graphics in scientific communication -- in building trust and integrity.

Title: Hierarchical modeling and analysis for spatial data by Banerjee, Sudipto

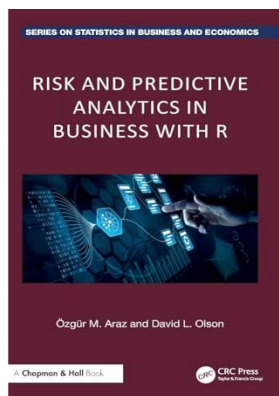

Boca Raton CRC Press 2026

Acc. No. 011173

Call No. 519.5 BAN

Summary: The text presents a comprehensive and up-to-date treatment of hierarchical and multilevel modeling for spatial and spatio-temporal data within a Bayesian framework. This book reflects those changes, introducing new methods, expanded applications, and enhanced computational resources to support researchers and practitioners across disciplines, including environmental science, ecology, and public health. An accessible introduction to GPS mapping, geodesic distances, and mathematical cartography.

Title: Risk and predictive analytics with R by Araz, Özgür M

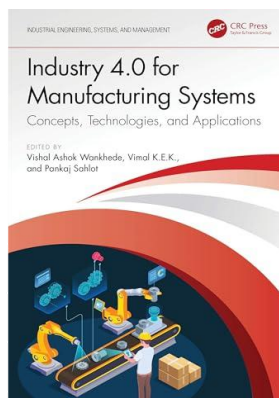

Boca Raton CRC Press 2026

Acc. No. 011174

Call No. 658.1550285 ARA

Summary: This book presents data mining and analytics tools with R programming as well as a brief presentation of Monte Carlo simulation that can be used to anticipate and manage these risks. RStudio software and R programming language are widely used in data mining. For Monte Carlo simulation applications we cover Crystal Ball software, one of a number of commercially available Monte Carlo simulation tools. Supply chain operations face many risks, including political, environmental, and economic.

Title: Industry 4.0 for manufacturing systems: concepts, technologies, and applications by Wankhede, Vishal Ashok

Abingdon Routledge 2025

Acc. No. 011175

Call No. 006.31 WAN

Summary: The book highlights the importance of intelligent decision-making in advanced production systems, and optimization of process parameters using fuzzy-based multi-criteria decision-making tools. It discusses the decision-making aspects of Industry 4.0 using machine learning and optimization techniques and helps in moving toward the digitalization of manufacturing systems. Explains cyber-physical system integration with Industry 4.0 technologies, cyber-physical systems in industrial robotics, and green cyber-physical systems.
